

Monthly Meeting for OptiColor Project

Month: August

Date: 27-August-2019

Type: Skype Meeting

Atten.: AM (S-Innovations Ltd) and AL (RISE)

Topics Discussed

1 Project Website

- Few uploads

2 WP1 - Project Planning

Tasks behind Schedule:

- Task 6.6 Scientific Paper 1 (Topic: Color combination Matrix)

3 WP2: Dissemination Activities

- The prepared paper was discussed and notes from AL will be implemented
 - > Paragraphs discussing Contribution & Impact of the study should move to the introduction. Is important to let the reviewer know right from the start how our study is breakthrough compare to current studies and the overall current approach of the topic of assessing colors for High Visibility Safety Apparel
 - > A graphical Abstract or Diagram of the image analysis methodology should be added
 - > Why the color enhancing filter was applied at the mean RGB of each window and not wright from the beginning to the whole image?
 - > Maybe we would wait for the validation result, so we can add the to the paper and have a more complete paper. AM believes that in such case the simplified method, using just the Color Matrix (without image processing) should be removed.
 - > Maybe a practical step by step guide of how to use the method should be added.
 - > Supplementary code to uploaded at Medley

4 WP4: Software development

- Color enhancing filter has been applied successfully

5 WP5: Validation

- Validation tests this week
- Report ready by end of September

6 Next Meeting

- Next meeting, Mid September, To be determined on the phone
